## PROFILE

Junior Cloud & DevOps Engineer, eager to contribute to innovative projects. Passionate about automation, cloud technologies, and modern DevOps practices. Open to new opportunities and ready to grow professionally.

## EDUCATION

**Cloud Engineering and Devops**, National School of Electronics and Telecommunications of Sfax (ENETCom)

2022 – 06/2025 | sfax, Tunisie

**Bachelor's degree in computer science and communication technologies**, Higher Institute of Applied Sciences and Technology of Mahdia

2019 – 2022 | Mahdia, Tunisie

## TECHNICAL SKILLS

### Cloud Platforms & Infrastructure:

- AWS ,Azure ,OpenStack

### Containerization & Orchestration:

- Docker,Kubernetes ,Container Networking

### CI/CD Tools & Automation:

- Jenkins ,GitLab CI/CD ,ArgoCD ,Terraform,Ansible ,Helm & Kustomize

### Monitoring & Observability:

- Prometheus ,Grafana ,Alertmanager ,Fluentd / ELK / OpenSearch

### Networking & Security:

- HAProxy, Keepalived ,Keycloak ,Network concepts (NAT, firewalls, routing)

### Web Frameworks:

- Flask , Node.js , Angular

### Programming Languages:

- Java, JavaScript, Python

## CERTIFICATIONS

- DevSecOps - Kubernetes DevOps & Security
- OpenShift 4
- Terraform Basics Training Course
- GitLab CI/CD: Architecting, Deploying, and Optimizing Pipelines
- AWS Cloud Practitioner (CLF-C02)
- Artificial Intelligence on Microsoft Azure

## LANGAGES

**Arabe** — Native/Bilingual

**Anglais** — Proficient

**Français** — Fluent

**Italien** — Basic

## AWARDS

**1st Place - Green Tech Hackathon, WE-SPICE Program – Innovation training (TU Chemnitz & DRÄXLMAIER)**  
17/10/2024

## PROFESSIONAL EXPERIENCE

### Cloud & DevOps Engineer - Design of a Distributed Private Cloud with OpenStack for Resilient Applications on Kubernetes, KPIT Technologies

02/2025 – 07/2025 | Sfax, Tunisie

- Designed and automated a multi-node private cloud using OpenStack, Ceph, and Kolla-Ansible, reducing deployment time by 40%.
- Built a secure, cost-optimized private cloud, reducing public-cloud spend by 30–40% while ensuring 99.9% availability.
- Implemented distributed storage with Ceph, providing high scalability, redundancy, and fault tolerance for cloud workloads.
- Engineered and configured complex virtual networks (OpenStack, VXLAN, NAT).
- Ensured high availability of control nodes with HAProxy and Keepalived.
- Provisioned VMs and OpenStack networks via Terraform, achieving 100% automated deployments.
- Deployed a Kubernetes (K3s) cluster within OpenStack VMs to ensure reliable orchestration of containerized applications.
- Implemented centralized monitoring and observability (Prometheus, Grafana, Fluentd, OpenSearch), improving incident detection and response time.

### DevOps Engineer - ArgoCD Dashboard Development, Sofrecom Tunisia

07/2024 – 08/2024 | Sfax, Tunisie

- Deployed a Kubernetes (K3s) cluster and automated deployments using GitLab CI/CD and ArgoCD (GitOps), reducing deployment errors by 40% and accelerating environment setup.
- Designed a custom ArgoCD dashboard and enhanced monitoring with Prometheus, Grafana, Alertmanager, cutting incident detection time by 50%.

### Cloud & DevOps Engineer - OpenStack Cloud Deployment & Containerization, Primatec Engineering

06/2024 – 08/2024 | Sfax, Tunisie

- Deployed a private OpenStack cloud (Packstack) and evaluated installation methods (Kolla-Ansible, DevStack) to optimize scalability and performance.
- Set up a Kubernetes (Minikube) cluster and managed containerization with Docker to streamline web application deployments.

### DevOps Engineer - Deployment Automation with Ansible, GENIOS

02/2022 – 05/2022 | Mahdia, Tunisie

- Automated multi-machine configuration and deployments (Docker, DNS, critical services) with Ansible, ensuring consistency and reliability.
- Improved availability through proactive maintenance and automation of infrastructure tasks.

## ACADEMIC PROJECTS

### CI/CD Automation with AWS Step Functions, Academic Project

09/2024 – 01/2025

- Automated workflows with AWS Step Functions, Lambda, and CloudFormation.
- Integrated CI/CD with Boto3 for seamless deployments.

### GitOps with Argo CD, Final Year Project

09/2023 – 05/2024

- Administered Kubernetes clusters (K3s, Kubeadm, Minikube) for testing and development.
- Implemented automated CI/CD and Infrastructure as Code with Argo CD and Jenkins following GitOps principles.

### Pharmacy Management Web Application, Academic Project

10/2024 – 12/2024

- Developed a web app with Angular (frontend) and Node.js/Express (backend).
- Used MongoDB for product management and JWT for secure authentication.

### CI/CD Automation with GitHub Actions & Kubernetes, Academic Project

01/2023 – 02/2023

- Designed a CI/CD pipeline with GitHub Actions for a containerized application.
- Automated deployments on Kubernetes to ensure scalability and resilience.

### Kubernetes implementation, Private Cloud, Academic Project

02/2021 – 05/2021

- Designing an open-source Kubernetes platform, integrating Red Hat OpenShift, to establish a reliable and scalable private cloud solution.
